SUMMARY

Operations Executive with hands-on experience in office administration, resource management, inventory handling, and workflow automation. Skilled in Google Sheets scripting, AI-assisted automation, web application development, and operational coordination. Experienced in managing office assets, live resource tracking systems, employee and inventory data management, and process optimization using AI tools and automation technologies. Strong analytical, technical, and problem-solving abilities with a focus on improving operational efficiency.

PROFESSIONAL EXPERIENCE

Operations Executive & Admin

Upstep Academy

December 2025 – Present

- Managing office operations, administrative activities, and day-to-day resource coordination.
- Handling office resources, inventory, assets, and employee-related operational data.
- Developed and maintained live resource management systems using Google Sheets scripting and AI tools.
- Built internal web applications for employee and inventory data management.
- Utilized PostgreSQL as backend database support for operational data management.
- Automated operational workflows and reporting systems to improve efficiency and reduce manual effort.
- Assisted in maintaining structured operational records, stock management, and internal tracking systems.
- Collaborated with teams to optimize office processes and digital workflows.

Digital Marketing Associate

Diginavigators

March 2024 – June 2024

- Gained experience in digital marketing, management, and client coordination.
- Worked on SEO, social media marketing, web services, and digital marketing strategies.
- Managed and coordinated projects for multiple clients.
- Developed communication, analytical, and operational management skills.

PROJECTS

AI Automation Drone

AI drones improve urban surveillance with autonomous navigation, object detection, and real-time decision-making, enhancing safety through traffic monitoring, crime prevention, and disaster management.

IDS (Intrusion Detection System)

Implemented an IDS to monitor network traffic, identify threats, and prevent unauthorized access.

WiFi Deauthentication

Developed a WiFi deauthentication attack to disconnect devices by exploiting vulnerabilities in wireless networks for testing purposes.

Hack an Android Device (Ethically)

Learned Android penetration testing and ethical hacking techniques using tools like Kali Linux. Identified vulnerabilities and recommended security measures.
